Busy Technology and Razor Network announce partnership

Busy Technology is happy to reveal its strategic collaboration with **Razor Network.** Through this integration, Razor Network will provide bridge solutions for the Busy network with a trusted and uninterrupted feed from the various blockchain. This also means that the DApps on Busy can use the Integrated Razor Oracle and Razor Network will act as the most obvious and logical option as the data feed provider for Busy Network users.

. . .

About Razor Network

Razor Network is blockchain agnostic and truly decentralized, making the process of procuring off-chain data economical, reliable, and free from game theoretical attacks. Based on the PoS consensus mechanism, Razor punishes misbehaving nodes through strict Slashing penalties, ensuring the fidelity of the data transmitted to the blockchain through Razor's oracle nodes.

About Busy Technology

Through this integration, Razor Network will provide smart contracts on Moonbeam with a trusted and uninterrupted feed from the Ethereum Mainnet. This means that the DApps on Moonbeam can use the Integrated Razor oracle as well.

Busy DAO is an engine for B2C/C2C platforms with cutting-edge blockchain technology, DeFi solutions, Utility Staking, and NFTs.

Many new platforms can be built on the Busy DAO Engine as Blockchain Engine will be available to everyone who will see an advantage in it through Smart Contracts—fast, scalable, and without expensive fees.

The project aims to create an ecosystem of global decentralized and exclusive platforms in the first stage focused on the gig economy that will compete with the current centralized giants with exclusivity, offered quality of services, and benefits associated with decentralization.
